UTILITY BILLS MANAGEMENT & MONITORING SYSTEM

UTILITY BILLS MANAGEMENT & MONITORING SYSTEM

BACKGROUND & OBJECTIVE

- Centralized digital system proposed to streamline and modernize utility bill management across all offices.
- Replaces fragmented manual and spreadsheet-based utility bill processing mechanisms.
- Enhances visibility, reconciliation and consolidation of utility expenditure records.
- Establishes a structured, automated and transparent platform for utility data management.
- Maintains comprehensive records of utility consumption, billing, arrears and payment schedules.
- Provides master data management for utilities and vendors.

IMPACT, OUTCOME AND BENEFITS

- Introduces a centralized and transparent mechanism for managing utility expenditures.
- Improves the accuracy and reliability of utility-related financial data.
- Eliminates manual record-keeping and reduces data management inefficiencies.
- Enhances financial discipline through timely visibility of liabilities.
- Supports better budget planning and expenditure control.
- Reduces manual errors and administrative workload.
- Improves operational efficiency across all offices.
- Ensures transparent, accurate and effective monitoring of utility expenditures.
- Facilitates informed decision-making through reliable financial insights.

PROJECT DURATION

- May to June 2026
